AtlantiCare Regional Medical Center Medical Education Department is committed to providing trainees with a safe learning environment. The following safety procedures are currently in place in accordance with the NJ State Department of Health and AtlantiCare Infection Prevention Department:

1. Trainees are required to self-monitor for any signs and symptoms for 14 days prior to reporting to the medical centers and an employee health check is done two days prior to the start of training.
2. Trainees go through an extensive training with AtlantiCare Infection Prevention Team on current safety protocols.
3. Patients are screened in all care setting for signs and symptoms and are appropriately triaged and placed on isolation precautions as appropriate.
4. Patients are tested for COVID 19 at the time of admission.
5. Trainees are required to wear surgical mask, gloves and face shield in all patient encounters.
6. Trainees have access to appropriate PPE.
7. Trainees’ common areas (call rooms, cafeteria and classrooms) have been restructured to ensure proper social distancing and are cleaned and disinfected routinely.
8. Educational conferences are held virtually.
9. If able, clinical rotations are adjusted for trainees that are at high risk.
10. Residency Program and Clerkship directors closely monitor trainees for any exposure or symptoms and Occupational Health provides medical evaluations and testing as indicated.
11. Trainees have access to multiple support systems within and outside the institution including but not limited to: EAP, Psychiatry Intervention Program Hotline, Wellness Seminars, program specific resources.
